SUMMARY

I am a web developer with over 2 years of experience specializing in frontend development and user interface design, with a strong focus on user experience (UX/UI). I am proficient in Angular for consuming microservices, component layout, and authentication services. I have developed custom WordPress plugins using PHP and JavaScript. Additionally, I have contributed to the development of robust RESTful APIs, services, and modules using NestJs and TypeOrm. I utilize Git for version control on platforms such as GitHub and GitLab. My experience includes participating in projects following the Scrum Master methodology, where I have demonstrated strong skills in management, leadership, and teamwork.

EXPERIENCE

Hexa Solutions S.A.S. (05/2022 - 01/2024)

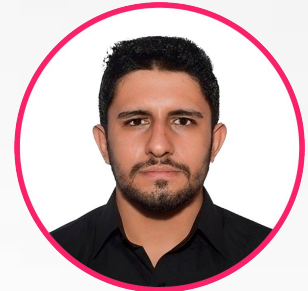

Web Portal: Led the development of a web portal in WordPress, creating custom plugins in PHP for functionalities such as content management and form creation. Incorporated SEO practices to improve site ranking. Managed improvement plans for performance, accessibility, and security scores.

Payment Gateway: Conducted the restructuring of the web portal's payment gateway developed in Angular with Wompi integration, resulting in a reduction in payment abandonment rates and an increase in digital collection volume.

Web Applications: Contributed to the creation of various web applications, including a tracking manager for pet welfare and safety. Also developed backend endpoints structured with NestJs and the graphical interface for the frontend of a platform for business information collection through surveys.

Hyperlink S.A.S (09/2021 - 02/2022)

Base Template: Designed and built modifiable base templates using HTML, JavaScript with jQuery, and CSS3 with Bootstrap for the implementation of customizable public portals, adaptable to specific client needs, prioritizing fast load times and smooth navigation.

SKILLS

- Angular
- React / React Native
- NestJs
- Typescript
- Javascript
- PHP
- HTML
- CSS
- Git
- Photoshop
- PrimeNg
- Bootstrap
