SUMMARY

Web developer with 4 years of experience specializing in frontend development and user experience (UX/UI) design. With strong expertise in Angular and React, I excel at creating visually appealing and functional interfaces while optimizing performance and accessibility according to Google PageSpeed standards. Skilled in microservices integration, authentication, and component layout. Additionally, I have developed custom plugins in WordPress using PHP and JavaScript. My experience includes building robust RESTful APIs and modules with NestJs and TypeOrm, as well as implementing SEO strategies that have increased website visibility and traffic. I actively participate in projects following agile methodologies (Scrum), demonstrating solid project management and leadership skills, and using Git for version control on platforms such as GitHub and GitLab.

EXPERIENCE

Freelancer (01/2024 - Present)

I have worked with various companies to develop tailored user interface solutions. For a client in the footwear industry, I developed a WordPress website that increased their sales by 15% in the first month, thanks to SEO optimization. I also handle updates and maintenance for plugins on previous projects and enhance frontend interfaces with attention to detail and visual appeal when required.

Hexa Solutions S.A.S. (05/2022 - 01/2024)

Web Portal: Led the development of a WordPress portal, creating custom PHP plugins for content management and forms. I implemented advanced SEO practices, which helped position the site at the top of search results for key terms such as "digital credit."

Payment Gateway: Redesigned a payment gateway developed in Angular, reducing payment dropout rates from 35% to 20% and increasing digital revenue collection.

Web Applications: Collaborated on the development of a system to track pet welfare and safety, and participated in building a platform for business data collection via surveys. I developed frontend features using Angular and backend modules with NestJs, significantly improving system functionality and data accessibility according to design and testing phases.

SKILLS

- Angular
- React
- NestJs
- Express
- NextJs
- NodeJs
- Typescript
- Javascript
- PHP
- HTML
- CSS
- Git
- Photoshop
- PrimeNg
- Bootstrap
- Tailwind

Hyperlink S.A.S (09/2021 - 02/2022)

Base Template: Designed and built a base of reusable templates and code snippets in Bootstrap, including headers, forms, sidebars, and more, which could be customized by colors and style according to client requirements. This approach allowed the creation of highly adaptable portals with optimized load times and smooth navigation.

Roojotech S.A.S (03/2021 - 07/2021)

Administrative Platform: Developed an administrative/organizational platform using Microsoft Power Platform to streamline the flow of information previously managed in Excel. The solution provided improved accessibility and management of key data such as processes, projects, and logistics, enhancing the company's internal efficiency.

EDUCATION

University Studies (2015 - 2022)

Universidad Industrial de Santander - UIS
Bachelor's Degree in Systems Engineering

Secondary Education (2015)

Colegio Cooperativo Comfenalco
Academic degree with business education

CERTIFICATIONS

Udemy (2024)
